**Data Systems Worldwide Achieves Advanced Unified Communications
Specialization
from Cisco**

Woodland Hills, CA – June 22, 2007– Data Systems Worldwide, Inc. (“DSW”) announced today that it has achieved the Advanced Unified Communications Specialization from Cisco®. This specialization recognizes DSW for its knowledge and expertise in selling, designing, installing and supporting a comprehensive Cisco Unified Communications solution.

Phil Mogavero, President and CEO for DSW commented, "Since our inception we have focused on overall excellence in the business solutions that we deliver. Cisco Unified Communications is helping to transform business. Cisco business communications solutions provide an integrated communications strategy and architecture, helping enable the secure combination of voice, video, and collaborative data applications within an integrated and intelligent network. DSW, with our 36 years of expertise and unique Intelligent IT solutions practices is ideally suited to help customers build scalable, reliable and secure infrastructure for the provisioning of unified communications. As unified communications solutions continue to change in their business and technical requirements, DSW will continue to invest in our capabilities ahead of our customers' requirements.

"We are pleased to join this very select group of partners recognized by Cisco with this certification and we believe that the development of this top level endorsement for its most advanced partners will be good for our customers in that it will direct them toward partners capable of executing and supporting their most complex, largest scale unified communications business initiatives," said Mogavero.

“As a Cisco Advanced Unified Communications Specialized Partner, Data Systems Worldwide is among the industry’s elite in providing integrated, collaborative and adaptive unified communications solutions,” said Edison Peres, vice president and chief go to market officer for worldwide channels at Cisco.

The Cisco Advanced Unified Communications Specialization is designed to help partners—whether small to medium-sized businesses or enterprise-scale organizations—meet a wide range of customer needs. It focuses on unified communications market opportunities that require advanced product knowledge and the ability to deploy solutions over multiple sites and geographies. Cisco Advanced Unified Communications Specialized Partners are specialists in building communications solutions based on the industry-leading Cisco Unified Communications portfolio. These products include the Cisco Unified CallManager, Cisco Unity® Connection, Cisco Unity voice messaging and unified messaging, and Cisco Unity Express, Cisco Unified Contact Center Express, Cisco Unified Videoconferencing and Cisco Unified MeetingPlace® Express.

The Cisco Channel Partner Program provides partners with training, validation and rewards for building the sales, technical and Cisco Lifecycle Services skills necessary to deliver value-added integrated solutions to customers. Cisco specializations reflect the depth of technology skills at three levels: Foundation Express, Advanced and Master. At each succeeding level, a partner demonstrates greater sales, technical and Cisco Lifecycle Services capabilities in specific technologies. Cisco channel partner certifications at the gold, silver, and premier levels reflect a breadth of skills across key technologies and a partner’s ability to deliver integrated networking solutions.

About DSW

Founded in 1971 and headquartered in Woodland Hills, California; DSW has been recognized as “One of the Fastest Growing Companies in Southern California,” a “Smart 100 Technology Company,” and a “VAR 500” company. In 2005, DSW’s founder Frank Mogavero was inducted into the exclusive Computer Industry Hall of Fame.

DSW offers an innovative approach in helping clients throughout the Technology Investment Lifecycle to improve application uptime and security, while decreasing operational cost. DSW invests heavily in researching and testing the industry's cutting-edge technology in their Secure Network Application Platform (SNAP) lab, where they train personnel to provide exceptional support, and tailor their Business-2-net (B2n) Portal to monitor and manage this technology. As a founding member of 1NService, Inc., DSW's client support extends throughout North America, and leverages a network of nearly 2000 IT professionals.

Hundreds of organizations have chosen DSW as their "Total Solutions Partner," because DSW is a leader in Intelligent IT Solutions for your network, security, applications, datacenter and facilities. With our unique right-sourcing model, we can provide you with the right amount of expertise to complement your internal IT department and help you meet your business objectives more efficiently.
